

Release Notes for rootstrust, Version 1.0, Build 397.2

November 18, 2018

General

This build contains only two corrections to Build 397.1.

Corrected Program Errors

1. **Windows launch script error.** We believe that we have finally fixed the launch.vbs problem. The fix that was included in Build 397.1 was not the answer.
2. **Name detail form.** A while back we fixed an error whereby a space was being displayed between the family name and given name of Persons for whom the 'Family name first' option was set. Somehow that error found its way back into the Name detail form. The error has been corrected.
